Committee To Make Study Of Session Length Change

Drought Causes Tour Cancellation

Because of prevalent drouth conditions, the annual Blue Grass tour, scheduled to take place today, has been cancelled. It is not yet known whether or not the event will take place la-

ter this summer Owners of farms which were on the itinerary apprised officials that danger of grass fires was so great that it would be impossible to receive visitors.

Dancing Classes Will Be Held On

Students attending the summer ssion of the university will be afforded the opportunity to take ballroom dancing under the direction of Leila Bush Hamilton. Miss Hamilton for the past year has been en-gaged in instructing undergraduate students in ballroom dancing

The lessons will be given in the Women's gymnasium every Tuesday and Thursday beginning today. The A small charge to cover expenses has been set at one dollar for three lessons. To register for this course, either sign up at the office of the Dean of Women or at the door of the Women's gymnasium. Both men and women students are invited to participate in the classes with a chance to learn new ball-

room steps. It is by popular request that Miss Hamilton returns to the campus to take up her work. She received her instruction from Ned Weaver of New York and has been actively engaged in the teaching of dancing in and around Lexington for a number of years. The system which Miss Hamilton uses is simplified to the point that anyone can learn the popular pastime in as short a time as three lessons.

Council On Higher Education Votes to Change State Institution Terms to Eight Weeks

A committee to work on problems involved in the change of length of summer session terms was appointed by Dr. Frank L. McVey, president of the University, at a faculty meeting held last week

The Council of Higher Education a body which prescribes, among other things, the length of school terms in the state, voted last semester, to increase the number of weeks in the summer terms of the University and state teachers col-"not less than eight

The committee, of which Dr. Jesse Adams, director of the summer session, is chairman, met for the first time Friday night. Problems such as fees, actual length, courses, U. K. Campus class period length, will have to be met before next summer when the new plan goes into operation.

The commission's new ruling means that instead of two five week terms, there will be one term, It is thought at present that next nmer one eight wecks term will be offered.

All teachers' colleges in the state will be effected by the plan as the Council of Higher Education has authority over them in this matter s well as over the University.

The committee is composed of 16 members, five of whom represent the University. They are President McVey, Dean W. S. Taylor of the Education college, and three members of the board of trustees Eight members represent state teachers' colleges, and three are from the state department of edu-

It is not known just when definite results of the committee's action will be announced.

Commerce Teachers To Go On Picnic

Teachers of commercial subjects will picnic at Grimes Mill. Wednesday, July 8. Cars will leave for Administration building.

All commercial teachers have been invited and will be allowed to bring one guest. They are asked to make reservations in the office of Dean Wiest not later than 5 p.

HERE SHALL THE KERNEL ALL STUDENT RIGHTS MAINTAIN

U. K. SCIENTIST HONORED

Dr. G. Davis Buckner, research chemist in charge of animal nutrition at the University of Kentucky agricultural experiment station, has been appointed for the second time as an official delegate of the United States to the World Animal Nutrition Congress, which will be held this year at Leipzig, Germany, July 22- August 3. Doctor Buckner represented this country at the last congress in Rome, Italy, in 1933, since the meetings are held triennially.

Not only has the University chemist been honored by appointment as an official U. S. delegate to the world conference, but he has also been selected to make a report at the gathering. He will present a paper on "A Study of the Vitamin D and Proteins in Kentucky Blue Grass," a subject which should add to the world renown of this section of Kentucky.

Doctor Buckner is to be congratulated on his appointment as official delegate of the United States to the international congress. The University also deserves congratulation for having so eminent a scientist as a member of its staff. Doctor Buckner and men such as he can lead the University of Kentucky to the top rank of American institutions of higher education.-The Lexington Leader.

THE HONORARY RACKET

Declaring that "honorary societies are in many cases only mutual admiration groups," Dean J. A. Park of Ohio State University told the National Association of Deans recently that some college honorary societies are "rackets." "Students pay about \$200,000 a year in initiation fees to about 300 honorary sorieties," he said.

Dean Paak may be a bit vicious in calling them "rackets"-the college honorary societies are probably more like minor grafts. But they are undoubtedly grafts in many instances.

A glance at Baird's Manual indicates that every college student should be able to make at least one honorary in something. It may be military proficiency, or service, or activity in any of a dozen extra-curricular fields. Few of them have rigid requirements.

Furidamentally, it's just good business. The national officers adopt a quasi-aloof attitude until the prospective member feels that a bid is an honor; but the national officers snap like trout at liver at every initiation payment.

They all started because somebody had business initiative. And they continue because human vanity has little sales resistance. Everyone likes honor, and the feeling of quiet dignity that goes with a key.-The Michigan State News.

WORLD PEACE

Mankind has been struggling to exist on this earth for countless centuries; ever since the day that the first individual appeared, strife and fighting have been rife. Man has been forced to combat for various reasons, all of which are in accord with the two outstanding natural laws of the human race, self-preservation and reproduction. In the first it was one person fighting against another; it then developed into a struggle between groups of men, or tribes; this has led to the modern condition of nations warring against other nations, whether for the principles of religion, race, language, economics, or territory.

In the face of this development of warfare, especially in respect to the modern phase, it seems rather disheartening to discuss world peace. The casual observer wonders sometimes whether the world is constructed so as to maintain peace. Certainly up until not far back it would have been useless to even mention the subject. Civilization is undergoing a decided change, however, emerging from a barbaric society into a more organized, more orderly, more scientific state. The peoples of modern nations are beginning to realize that war does not pay; they are commencing to understand that much happier relations can exist between contiguous countries at peace, that commerce, industry and trade are all stimulated in the absence of war.

Every day, owing to the growing number of tion.

inventions, the world is becoming more and more an organized unity. The telegraph, the telephone, the airplane and many such new discoveries, cause the corners of the earth to draw closer together. Thus, science is a powerful aid to world peace, and the realization also that science may become so deadly as to destroy the human race is conducive to a desire for peace.

How world peace is to be effected is not so simple a process as it sounds. It is certain that nations must first rid themselves of their petty hatreds, their mistrusts, and their own immediate ambitions. The world must act as a unit; it must sincerely wish for peace and must cooperate in obtaining it. The establishment of an international police force would be essential for the peace of the world. This would be composed of picked men from representative portions of the globe, their duties being to quell uprisings, strikes and to enforce the code of international law.

At present the vast program of armaments which most of the important nations are undertaking is just as detrimental to the peace of the world as any other single cause. The papers have been futll with assertions that the way for erything ... at least those were my peace lies in the constructions of munitions of war; surely nothing could be more foolhardy! The fact that every major country is building Benton's tavern more ships, cruisers, submarines, airplanes than coke ever before cannot lead to peaceful conditions. It can lead only to war, sooner or later, a deadly and ruinous war that needs but a mere spark to

The League of Nations and the World Court are definite steps in the right direction. At Geneva, or at the Hague, gather representatives place from many divers countries. The fact that they are there in a common cause is in itself encouraging. Opponents of the League point to the fact that this body has not actually accomplished any appreciable good. And what is worse is that this is really true! The world, however, does not appear to be ripe for such an institution; while many people may profess to be against war, their inherent principles cannot conceive of an association of nations. In this respect President Wilson was ahead of his time, whatever were his faults he possessed a sane, clear mind that could realize the efficacy of world cooperation.

The recent subjection of Ethiopia dealt a severe blow to the League of Nations. It seems from this that a great menace to world peace is the presence, in the civilized world, of such ultra-nationalistic and militaristic nations as Germany, Italy and Japan. One realizes that it is not the people themselves that are responsible; it is their demagogic, power-loving leaders. Nevertheless, such obstacles to peace should be removed. War is the creed of these people; their satisfaction and pleasure is procured by militaristic displays or exhibitions. If only they could be impressed with the utter horror of war and its subsequent aftermath, causing the gradual ruination of man's best physical speciments and the destruction of the existing financial systems. Mankind never ceases paying for past wars, and it is sincerely hoped that the day is not far off when world peace will be an accomplished fact.-The U. M. I. Cadet.

EDITOR'S NOTE: While The Kernel does not necessarily endorse all the premises set out in the above editorial, it notes with gratification that a leading military school publication takes the stand against aggressive militarism.

CALENDAR

JULY 7-The annual Blue Grass tour, originally scheduled for today, has been cancelled because of the dry condition in this county. It was announced that the tour may be made later this summer.

Special guests at the McVey's tea from 4 to 6 p. m. will be the College of Agriculture and the College of Engineering. Others, however, are cordially invited to attend.

JULY 9-At 7:15 o'clock, the concert will be held in the amphitheater behind Memorial hall.

Because he leaned too far over a balcony to pour water on a classmate below, a LaFayette from. student went to the hospital with a fractured

at 7:15 o'clock...in the evening

And a week from today...

'Twas rather a quiet week-end... as far as campus activities are conparty...everybody is welcome cerned...but certainly not otherwise ... what with ol' Fourth of July College of Engineering as special firecrackers banging away . . . and guests. celebrations of alleged independence everywhere...that wasn't so

Went to the big picnic last Tuesday...and ate burgoo...and played .and ran around ... and ev-. but when the time didn't get to eat burgoo ... nor play ball...nor run around .nor nothin'...just quietly sat in . and sipped a and danced . . . until they me . . . and for what? . . . stopped me Mr. Benton didn't like people to dance there . . . was my face red! Did you go the band concert last Wednesday?.... I still insist that they're very entertaining and worthwhile...let's see you there at the next one, which is Thursday at the same time.... and the same

That convocation last Thursday was something to hear . . . and see the morning performance was mediocre . . . according to consensus of opinion . but the night show: "Tea for Three" was every bit O. K. . enjoyed it myself . . . as did . or else . . . they're which is not telling the truth . . unlikely . . but why ramble on it was definitely a success.

Writing a column is really work .you've got to make it long. you've got to make it interesting to everybody...which in itself is practically impossible ... you've got to cover a lot of territory... and you wonder why columnists go nuts... Sometimes it isn't so difficult... you just ramble on actually...and fill up space..but then who reads it...but then who cares.

We guess we covered the past week...we guess...except for that alleged bit of scandal attempt ... which was neither clever...nor interesting ... except again ... to the parties concerned...the clever part about us ..is that we know we're not clever....which is being clever .if you get what we mean mear we don't . . So this week is probably gratifying to all . . . those concerned . . . and those very few who read this . . and to whom I am deeply indebted for their kindness

and interest... or something.. And in that world of ours we which includes 8 have life great deal of things...most interesting of which...is the progress of the political campaign where the Communists have adopted a "Stop Landon" slogan . . . to take votes away from Landon

even if they must go to Roosevelt is advice of Earl Browder, chief The communist in this country . . advice is probably the greatest asset the Republicans can receive... At any rate it's gratifying to know that the communists think this country is in good hands...when F.D.R. runs it... Read a very interesting article

on "Big Jim" Farley... who takes the blame for everything the democrats do...He is openly a believer that "to the victors belong the spoils"...A few years ago...when he started portioning out the jobs ...he had 18 lifeguards . . . who couldn't swim a stroke ..at one of New York city's greatest swimming resorts...as a matter of fact . . . they could row . . . so they would row beyond the swimmers . . . and . . great thing . . . this spoils system

Sorry if we seem partial....we don't mean to be ... it's just that we read the right publications...which are wrong as far as the New Deal is concerned...and which may be wrong themselves....but who can tell...All we know is what we read in the papers...with the greatest apologies to the great Will Rogers

and that's what the papers say maybe sometimes soon I can run across some interesting data on the Republicans...if I do...I'll relay it to you...but in the meantime...I can only realize that lots of money is being spent...and I can't realize where it is finally going to come

Have you ever tried to convince an advertiser that summer school students have purchasing power? ...You should try it some time... when you're primed for a long and tedious debate....Why don't you people mention the power of the Kernel advertising when you buy in town .. you'll get better treatment....for the merchants downtown like to deal with the students why don't you try it sometime when you have something to buy

look in the Kernel first. And so enough for that world for a while and back to this campus. and the program for this coming

First on the list of events you shouldn't miss this week of course .the Convocation ... morning...at Memorial hall...with the "Guv'nor" giving an address. Then in the afternoon of the same day...we again have one of

Mrs. McVey's famous tea parties.

LEAP YEAR LETTER

My Dearest Darling:

I have already written you one letter today, but my poor heart just won't stop pounding for you, and even when I put this on paper it thrills my very soul in knowing that it is going to the one that love so tenderly.

It takes a lot of courage to write this letter, and I have hesitated a long time before I could bring myself to do it, but seeing that this is leap year, maybe you won't judge me so severely. After hours and hours of restlessness and sleepless 12:15 to 12:30—Jessamine 4-H Club nights, I can endure the anxiety no longer. looking down at me.

"Most assuredly,"

From my position in the water I could look up and see Steve and his cohorts looking down at me,

shaking with laughter. As the water was very cold, I determined to remove myself as quickly as possible to some more comfortable medium. Consequently I swam to the ladder at the base of the diving platform without attempting to locate my freshman lid, which had detached itself sometime during the plunge. When I reached the top of the ladder my captors had disappeared, leaving me very cold, wet, and without means of trans-portation some eight or ten miles from my residence. I was elated. America had not disappointed me, and even if my teeth were chattering I was happy. I started walking down the road, which was very dark and lonely. The only sounds I could discern were the rustling of the wind through the underbrush which bordered the lane and the Davis' Abode in Lexington — A soggy sound my shoes made as I walked. I had a very exciting time imagining hidden dangers and to designate the old Ficklin home, would descend on me. It must have been more than a mile to the first while attending Transplyania Colsign of habitation. This was in the form of a petrol dispensary combined with a small establishment for the sale of what the made by the late Augustus Luke-Americans term "hamburgers," man from his statue of Jefferson which are a greatly relished form

I was happy to know that I was tucky famous in past days and in taining transportation to town.
